

CATERING

As part of our mission to do good by people and our planet, we strive to support local businesses committed to sustainable foods and packaging. We have identified the following vendors as our preferred partners for a more social and eco-conscious lunch-and-learn.

Local Spots

NaanStop - A local, independently owned and operated Indian food restaurant with compostable plates and utensils.

Farm Burger - Choose between grass fed beef, chicken, or housemade vegan for this build-your-own-burger bar. Compostable/recyclable serving containers, cutlery, plates and napkins are included.

Chipotle - Well-known and loved Mexican grill. Includes compostable serving containers.

Sun In My Belly - Local Decatur brunch spot brings you several mindful tapa stations to choose from for your lunch and learn.

Plant-Based Pizzeria - Just want some pizza? This restaurant offers plant-based options to satisfy your mid-day cravings.

We are also happy to use caterers of your choosing, so please let us know if there is an alternative business you'd prefer to order from!
